

Aerial Non-Insulated Cable M range

Технические характеристики

Consistency - copper range not less than M1 (GOST 859-2001);

Electric resistivity of wires - not more than 0,01770 Ohm•mm²/m;

Размеры

Nominal cross-section area of wire

- - 35-120 mm²

Nominal diameter of wires

- - from 2,51 to 3,15 mm

Срок изготовления

30 days

Упаковка

Reel №14 (GOST 5151-79)

Bus weight: up to 1800 kg;

Reel sizes:

Outer diameter (height): 1400 mm;

Inner diameter: 750 mm;

Width: 900 mm;

Область применения

Aerial non-insulated copper wire of M range for aerial power lines is used in atmosphere of 2nd and 3rd air types on land and sea of all climatic regions while aerial power line construction and also for feed-lines of electric transport.
